ABOUT ME

I am currently a student of the English Education Undergraduate Program. I have a strong passion regarding User Interface (UI) and User Experience (UX) for digital products. I studied UI and UX independently through several online course providers and have completed several case-based projects related to UI and UX Design.

WORK EXPERIENCE

Qwords Cloud Web Hosting Indonesia · Internship

(April 2023 - May 2023)

 - Conduct a usability test for the design
-

EDUCATION

Universitas Jenderal Soedirman

(August 2019 - Present)

Bachelors English Education

3,61

PROJECT

UI UX Mini Project - Civilabs

(August 2022 - August 2022)

<https://linkshortner.net/UIUX-Civilabs>

Starting from the problem of fresh graduates having difficulty getting jobs, I conducted interviews with several fresh graduates and found that they had difficulty making ATS Friendly CVs. Then I continued the design process by creating a user persona, journey mapping, empathy mapping, user flow, wireframe, and completing a high-fidelity design of a mobile application to automatically create an ATS Friendly CV called Civilabs.

UI UX Design Portfolio on Behance

(May 2023 - Present)

UI Design Challenge - UStock

(December 2022 - December 2022)

<https://linkshortner.net/UIUX-Ustock>

In this project, I made a UI Design Challenge, a mobile app for buying and selling stocks. I made everything from system design, components, wireframes, to high-fidelity designs for three screens. Even though this project is a

UI Design challenge, I still pay attention to the UX design in this design.

SKILL

UX Designer (Novice), UI Designer (Novice), Adobe Photoshop (Novice), Figma (Proficient), Adobe Illustrator (Proficient).
