Website Redesign

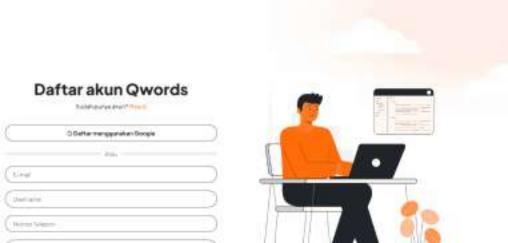

Carla Kusuma Valeska

Project Overview

Saat ini Qwords ingin membangun halaman awal website mereka. Dimana di halaman awal ini pengguna Qwords akan bisa melakukan pembuatan akun, akses masuk (login), dan lupa password. Kebutuhan halaman-halaman tersebut adalah sebagai berikut:

Login Form

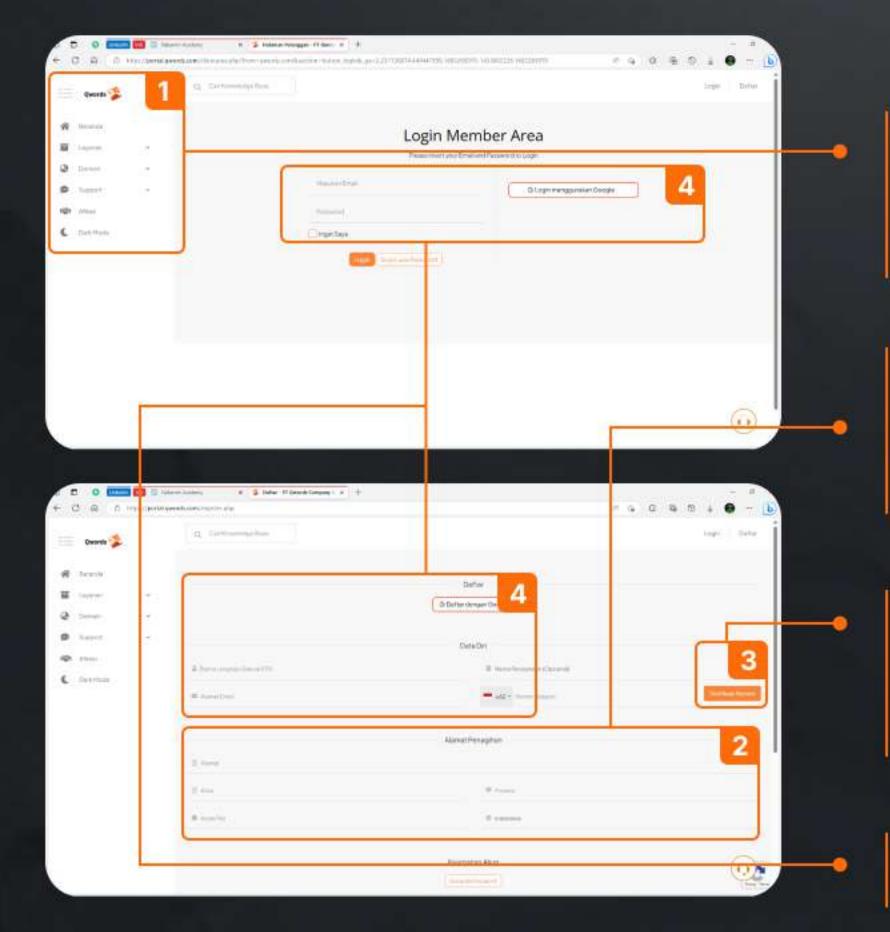

Berisi inputan utama yaitu username dan password.

- Register Form

 Berisi inputan utama yaitu username dan password. Setelah registrasi sukses maka akan kembali ke login form.
- Torgot Password Form

 Dapat dilakukan menggunakan nomor handphone atau email. Setelah sukses melakukan forgot password akan kembali ke login form.

Problem Statement

Problem

Bilah menu mendistraksi pengguna ketika hendak melakukan proses registerasi. Selain itu tombol pada bilah menu tersebut juga tidak berfungsi sesuai dengan apa yang tertulis pada button.

Proses pendaftaran atau registerasi yang terlalu kompleks. Pada halaman register saat ini terdapat terlalu banyak kolom informasi pengguna yang harus pengguna lengkapi.

Proses verifikasi nomor handphone menghambat proses pendaftaran. Pengguna mengeluh karena harus membuka ponsel mereka untuk melihat kode OTP di tengah-tengah proses pendaftaran.

Layouting yang tidak konsisten antara halaman login dengan register.

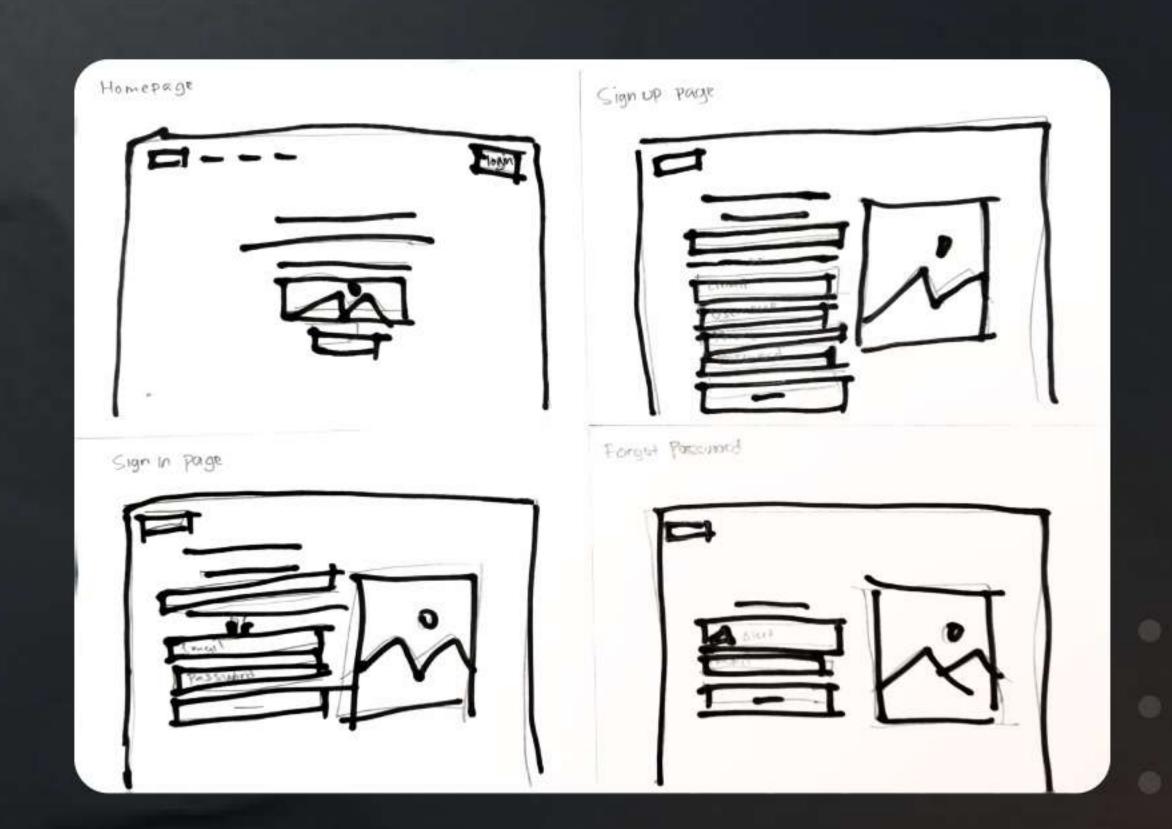

Solution Idea

Ganti bilah menu dengan logo Qwords yang dapat menavigasi pengguna ke homepage. Sehingga pengguna tetap memiliki akses Kembali ke hompage namun tanpa harus terdistraksi oleh menu lainnya.

Informasi berkaitan dengan alamat penagihan diminta setelah proses pendaftaran selesai. Sehingga proses pendaftaran tidak membebani pengguna.

Proses verifikasi nomor handphone dilakukan setelah proses pendaftaran akun.

Buat layout design yang lebih konsisten

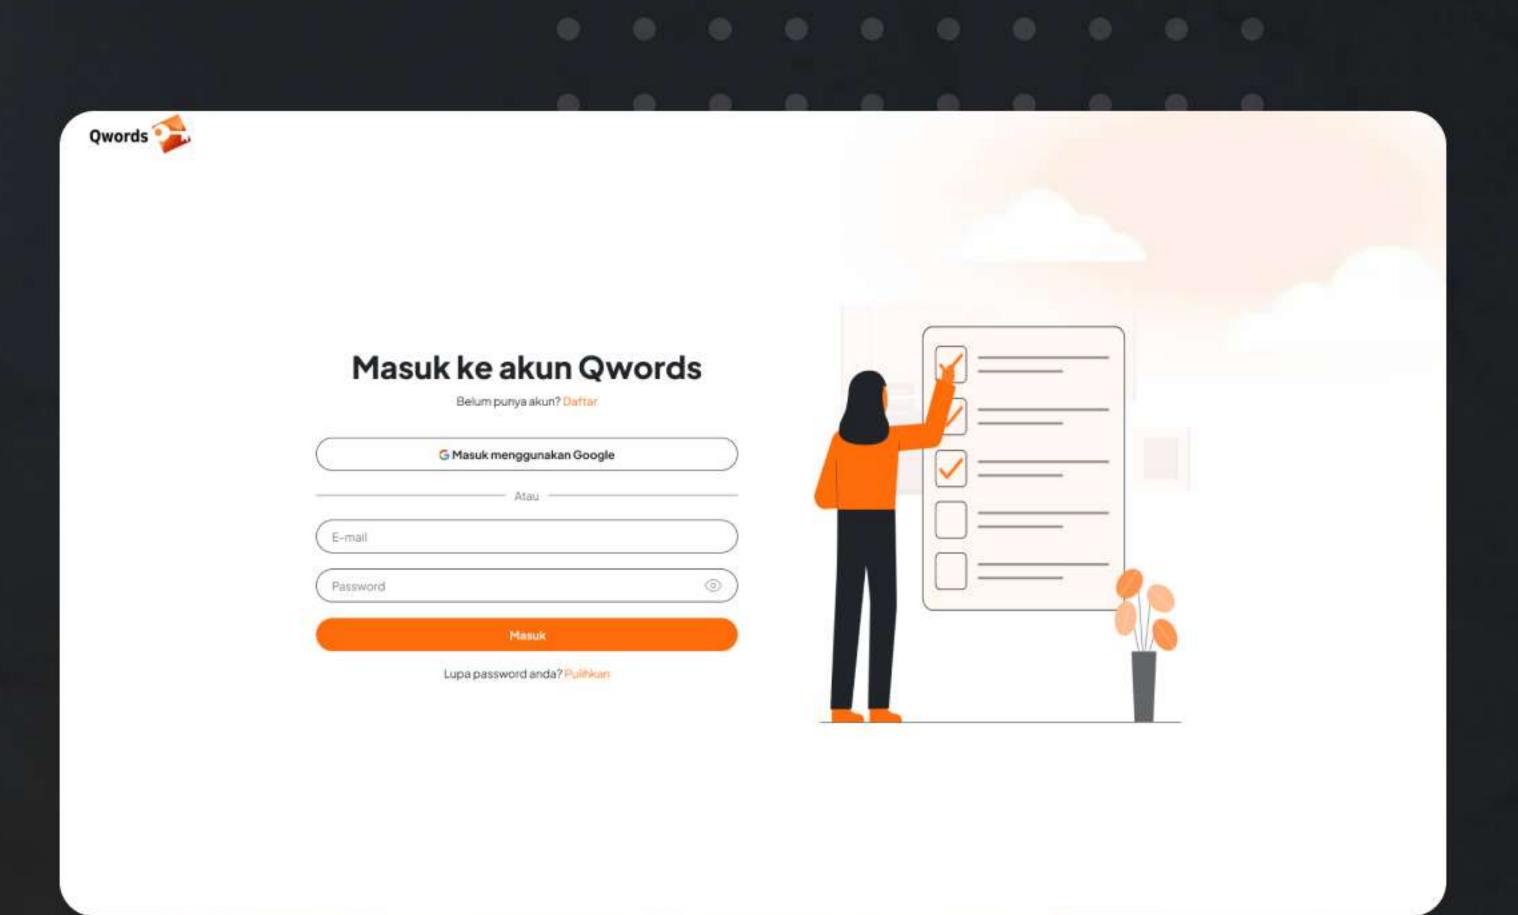

Paper Mock-up

Berikut ini merupakan paper mock up desain website Qwords yang telah disesuaikan dengan masalah dan solusi yang sudah disebutkan sebelumnya

Sign-in Page

- Alur sign-in yang singkat dan efektif
- Menyediakan fitur pulihkan password
- Desain yang simple atau minim distraksi
- Desain yang accessible
- Desain yang sesuai dengan style guide website Qwords

Daftar akun Qwords

Sudah punya akun? Masuk

G	Daftar menggunakan Google	
	Atau —	
E-mail		
Username		
Nomor Telepon		
Password		@
	Daftar	

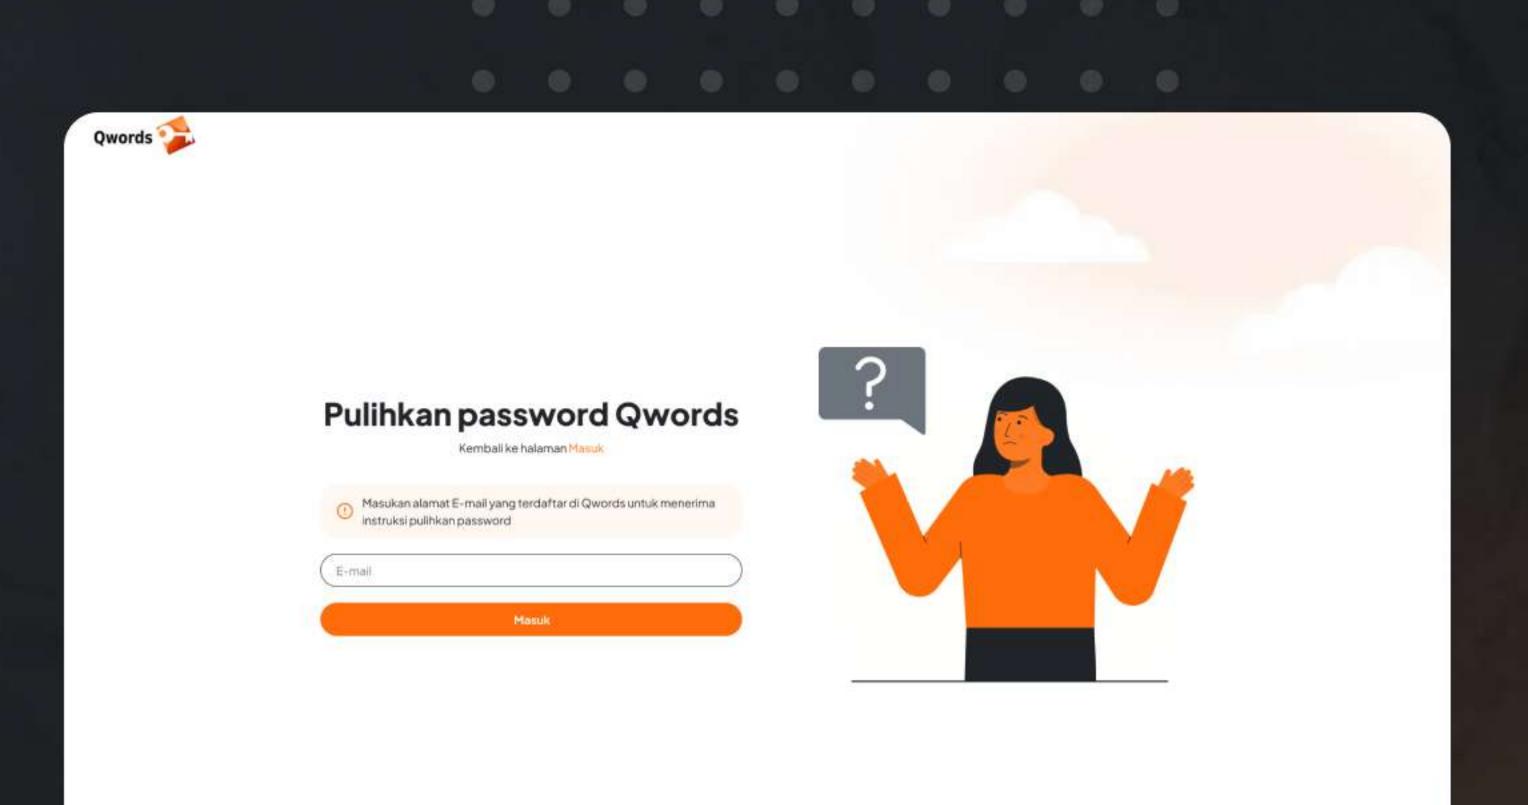

Sign-up Page

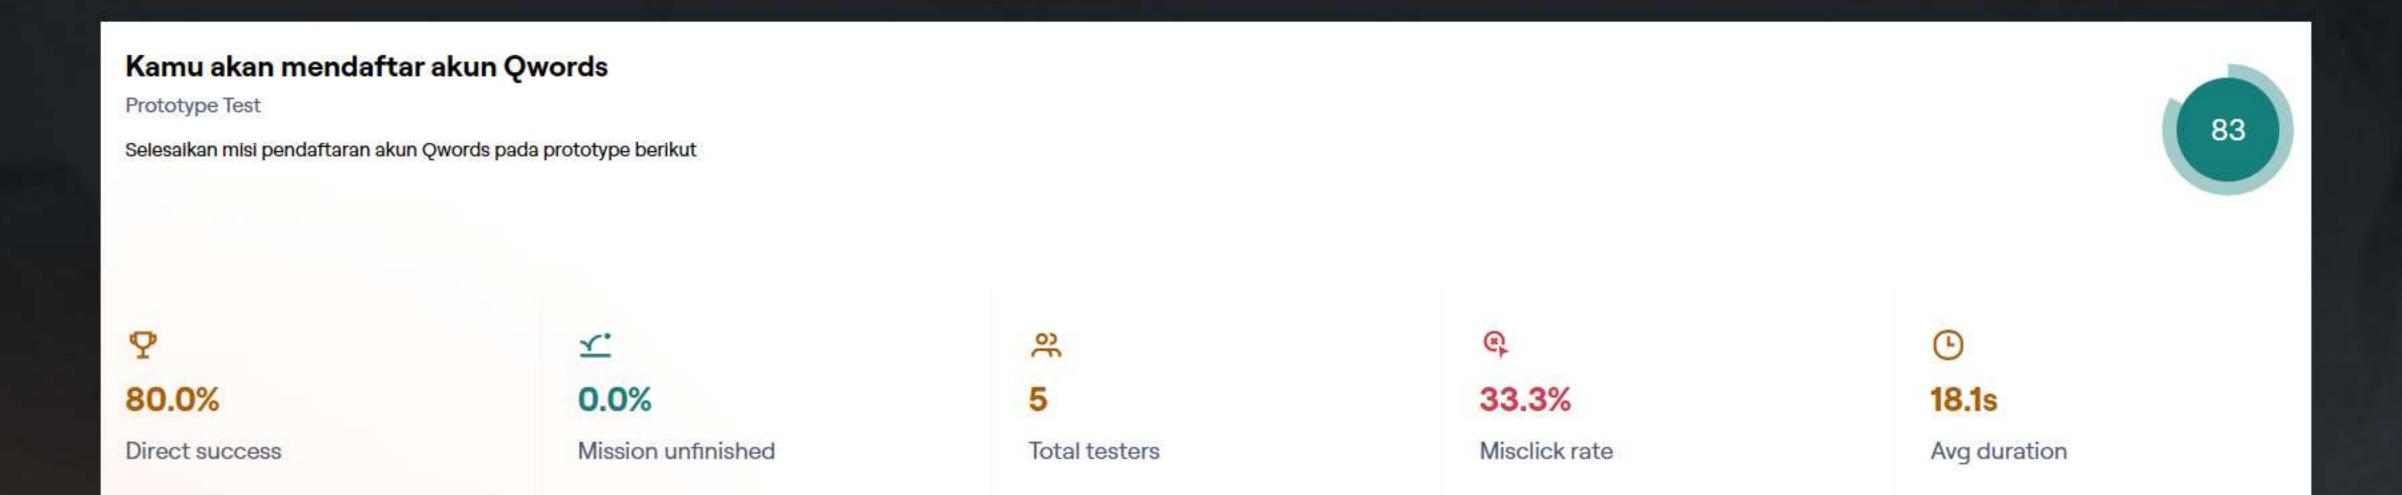

- Alur registerasi yang singkat dan efektif
- Menghilangkan kolom info penagihan untuk mempersingkat proses registerasi
- Desain yang simple atau minim distraksi
- Desain yang accessible
- Desain yang sesuai dengan style guide website Qwords

Recovery Page

- Alur pemulihan password yang singkat dan efektif
- Instruksi yang jelas
- Desain yang simple atau minim distraksi
- Desain yang accessible
- Desain yang sesuai dengan style guide website Qwords

Usability Testing

Pada usability testing yang saya lakukan, 5 (100%) responden berhasil melakukan pendaftaran akun. Namun pada prosesnya 3 (60%) responden sedikit mengalami kebingungan pada halaman awal atau homepage. Kebingungan yang mereka alami adalah **tidak adanya tombol registerasi/daftar** pada homepage. Sebagai pengguna baru mereka berekspektasi untuk melakukan registerasi terlebih dahulu sebelum bisa melakukan login. Selain itu, 2 (40%) responden juga gagal menyadari bahwa yang mereka lakukan adalah aktifitas log-in bukan daftar.

Recomendation

- Tambahkan button registerasi pada homepage bersandingan dengan tombol log-in.
- Perjelas navigasi pengguna mengenai page daftar dan log-in

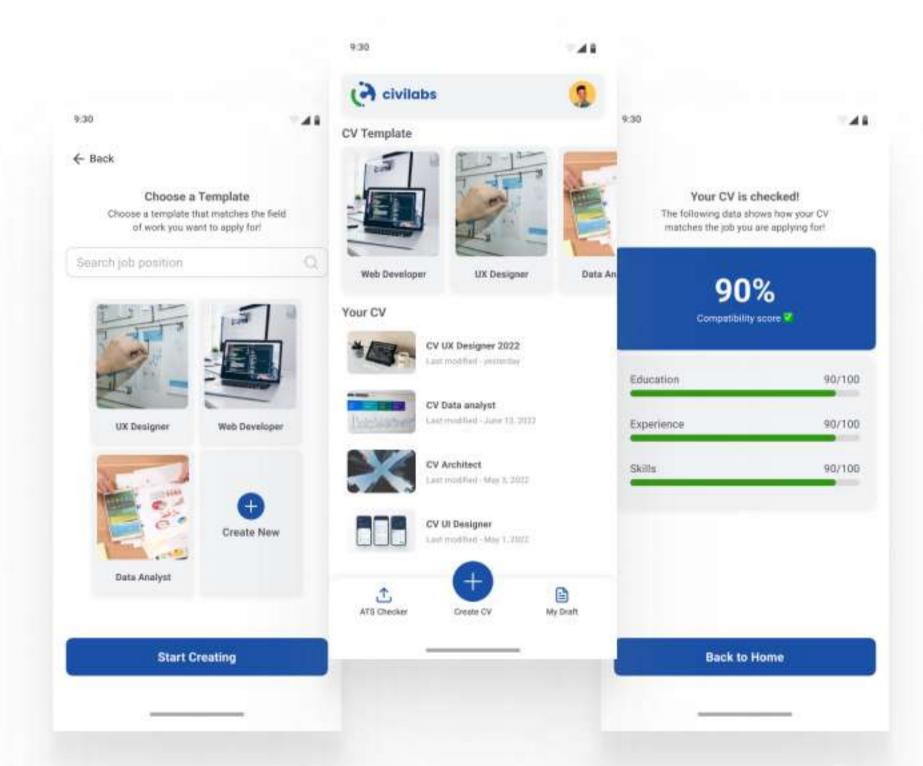

Thank You!!!

UI/UX Design Mini Project

A mobile application to help fresh graduates make a good and ATS friendly Curriculum Vitae

By Carla Kusuma Valeska

Background 😜

Starting from the problem of fresh graduates having difficulty getting jobs, I conducted interviews with several fresh graduates and found that they had difficulty making ATS Friendly CV. Then I continued the design process by creating a user persona, journey map, empathy map, user flow, wireframe, and completing a high-fidelity design of a mobile application to automatically create an ATS Friendly CV called Civilabs.

User Research 🚄

Making an Interview Protocol

Collecting Data

Reducing Data

Displaying Data

Making Conclusion

Research Findings

After completing undergraduate studies, 5 out of 6 fresh graduates I interviewed chose to look for work rather than continue their studies to a higher level. In the process of looking for work there are several problems or obstacles that the informants mention as follows;

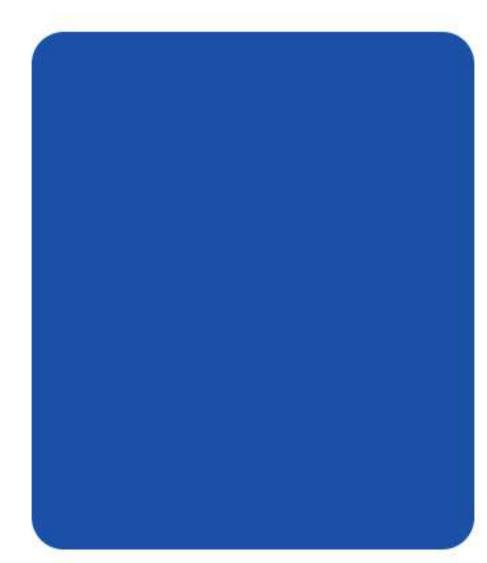

"Susah banget nyari loker yang sesuai jurusanku"

"Bingung nyari loker di mana" "Susah ah, harus punya pengalaman kerja minimal 2 tahun" "Aku beberapa kali daftar kerja tapi gapernah dapet panggilan interview"

"Kayanya aku gaketerima karena CV-ku jelek deh" "Aku lebih ke bingung bikin portfolio sama CV sih" "Banyak banget template CV di internet tapi aku gatau mana yang bener"

"Katanya CV harus ATS friendly, CV ATS friendly tuh yang gimana sih?"

User Persona

Panji 22Tahun Mahasiswa

Tentang

Panji is a fresh graduate who has been unemployed for almost a year. He has applied to various places but to no avail.

Kebiasaan

1) Applying for a job, 2) making a CV, 3) looking for job vacancies using gadgets, 4) waiting for a job interview invitation.

Minat

1) Technology companies, 2) human resources, 3) financial managers, 4) indoor work.

Tujuan

1) Get a job, 2) get a job interview call, 3) get an internship opportunity, 4) improve the quality of his CV

Kesulitan

1) Didn't get a job interview call, 2) didn't know how to make an ATS friendly CV, 3) couldn't find a CV template that matched the desired position.

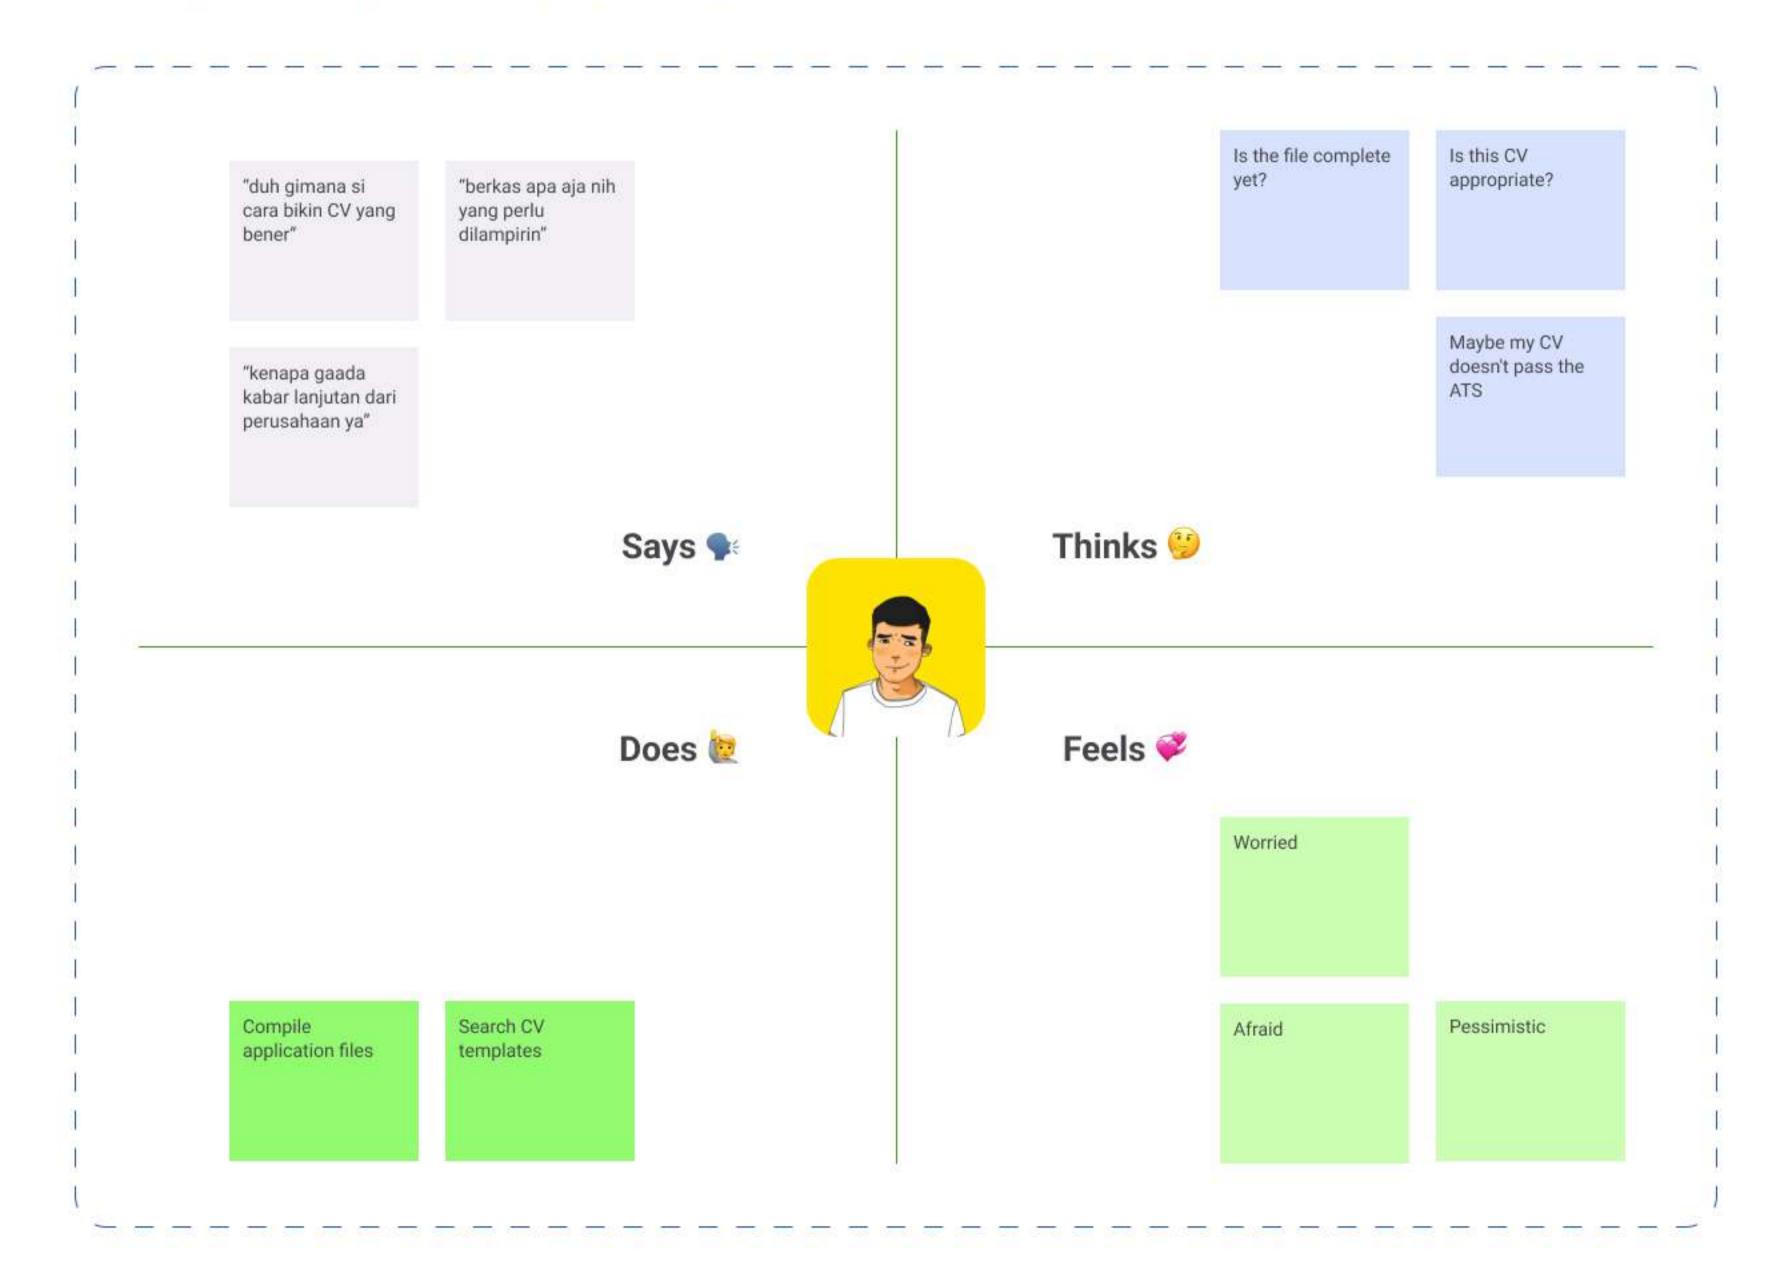

Kebutuhan

1) Something that can make a CV, 2) CV template that fits the desired position.

Journey Mapping

Making CV Submit application Waiting for a reply Looking for job Choose the desired Complete the file job position application from the company vacancies or internships requirements Journey 🗢 1. Browse Linkdln and 1. Matching interests and 1. Prepare the required 1. Looking for a suitable CV 1. Send application files via 1. Waiting for notification of the next selection stage. abilities email or POS Instagram documents Photocopying template Action = 2. looking for information 2. Determine the information 2. Didn't get further notification 2. Ask a colleague files and buying stamps about the selected position to include "yes posisinya "Yes akhirnya "yah syaratnya ga "banyak juga nih "Ini ramah ATS ga "lama bgt nih dokumen yg harus sesuai" "nah ini nih yaa?" "Isinya udah terkirim juga" gaada kabar" cocok nih" yang aku cari" dilampirin" sesuai belom yaa?" "jangan2 CV-ku ga Thoughts = kebaca ATS lagi" Emotional Experience 🗢 CV template ATS platform provider platform checker Opportunity 🗢

Lo-fi Design

Wireframe

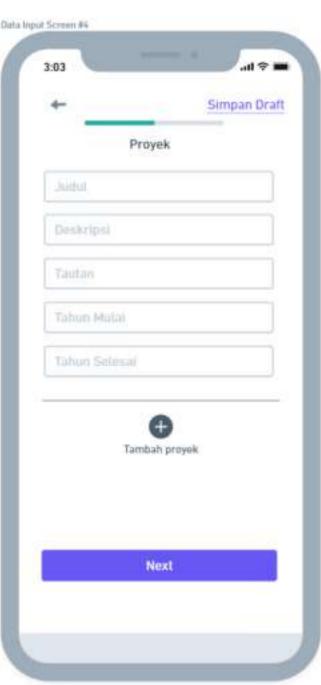

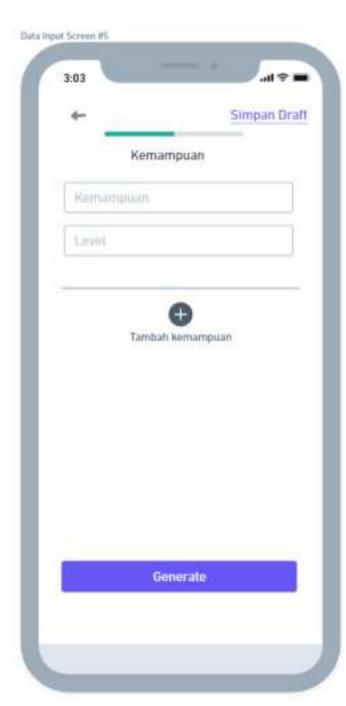

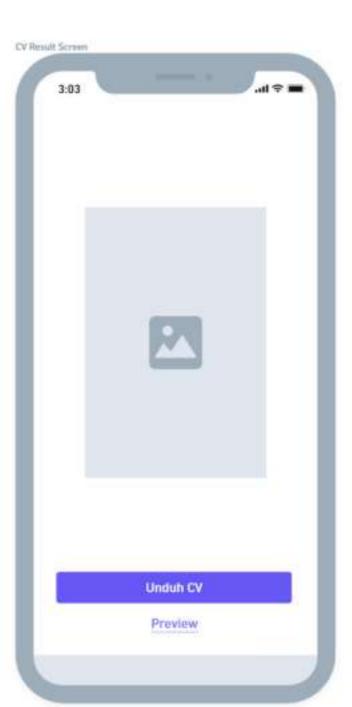

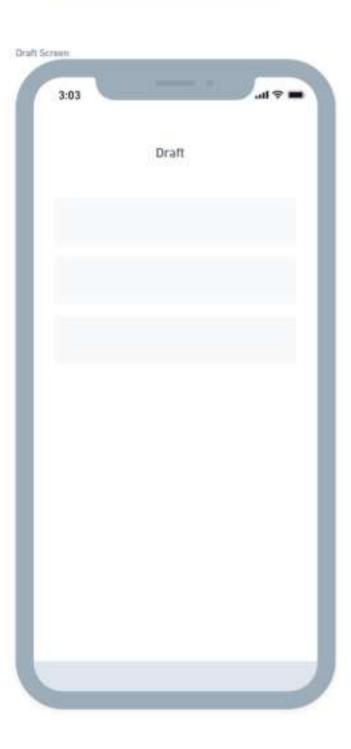

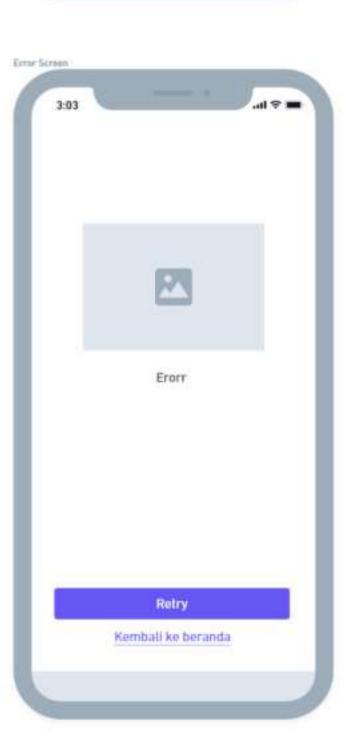

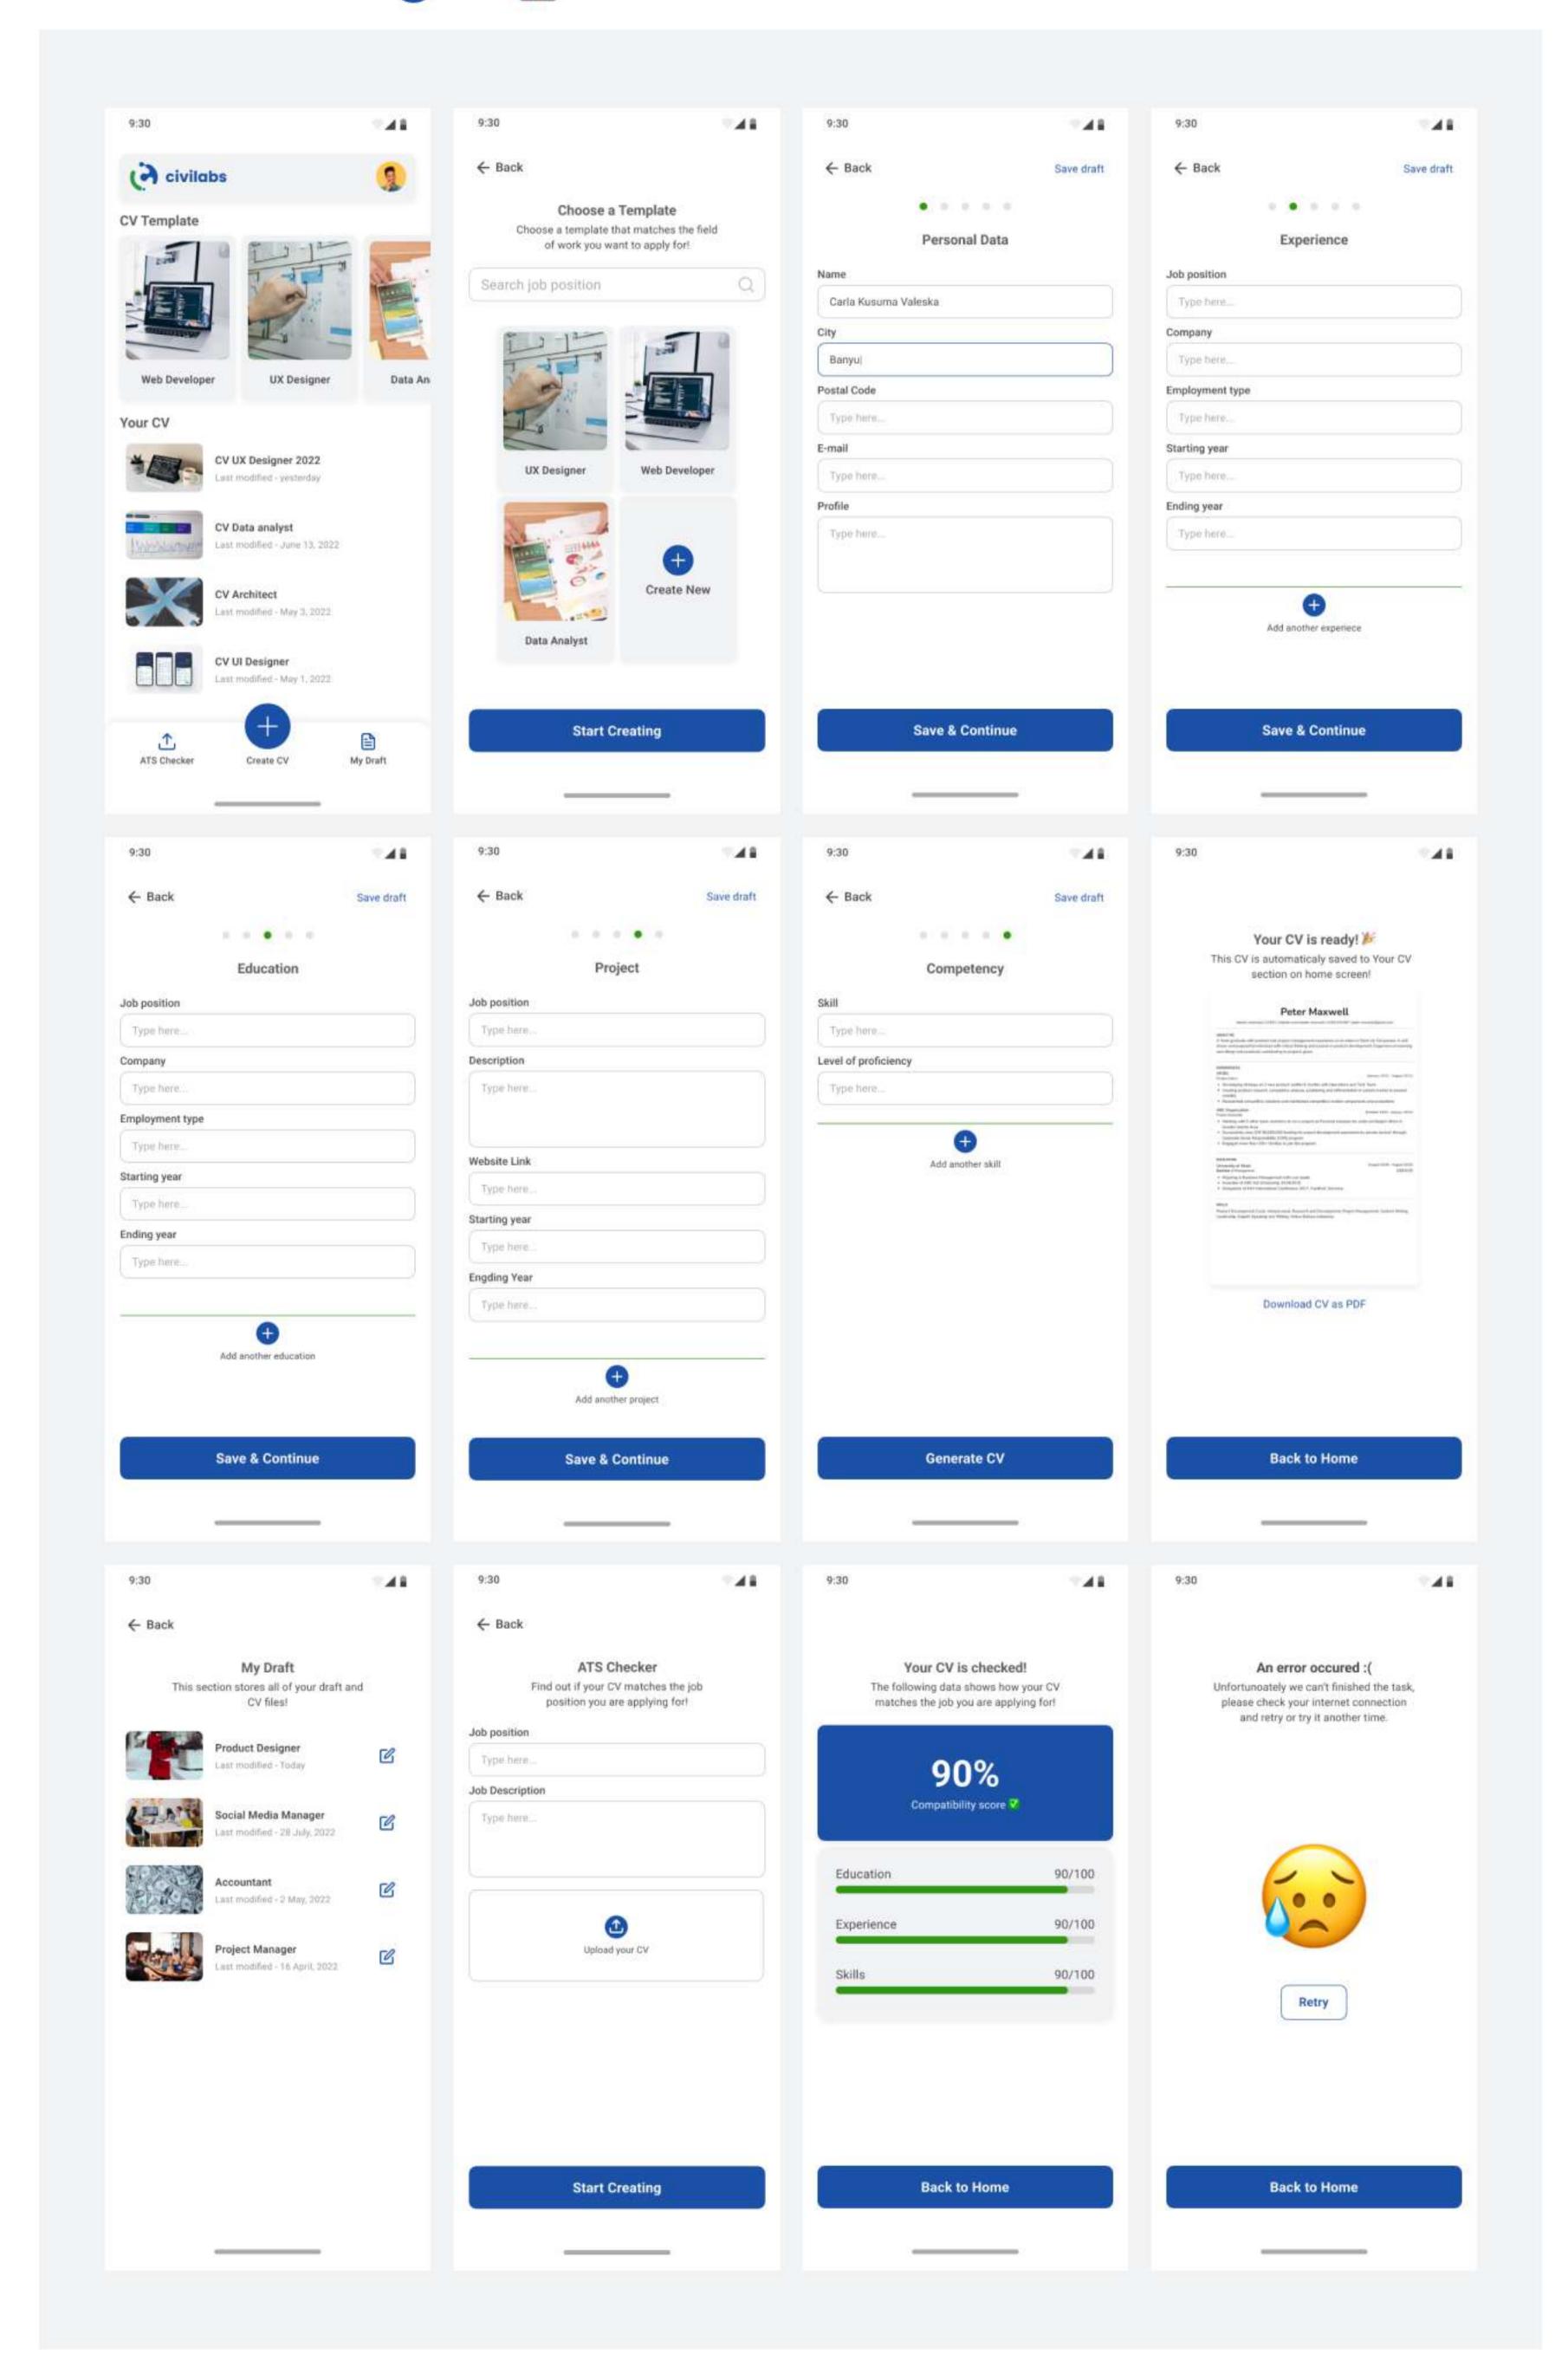

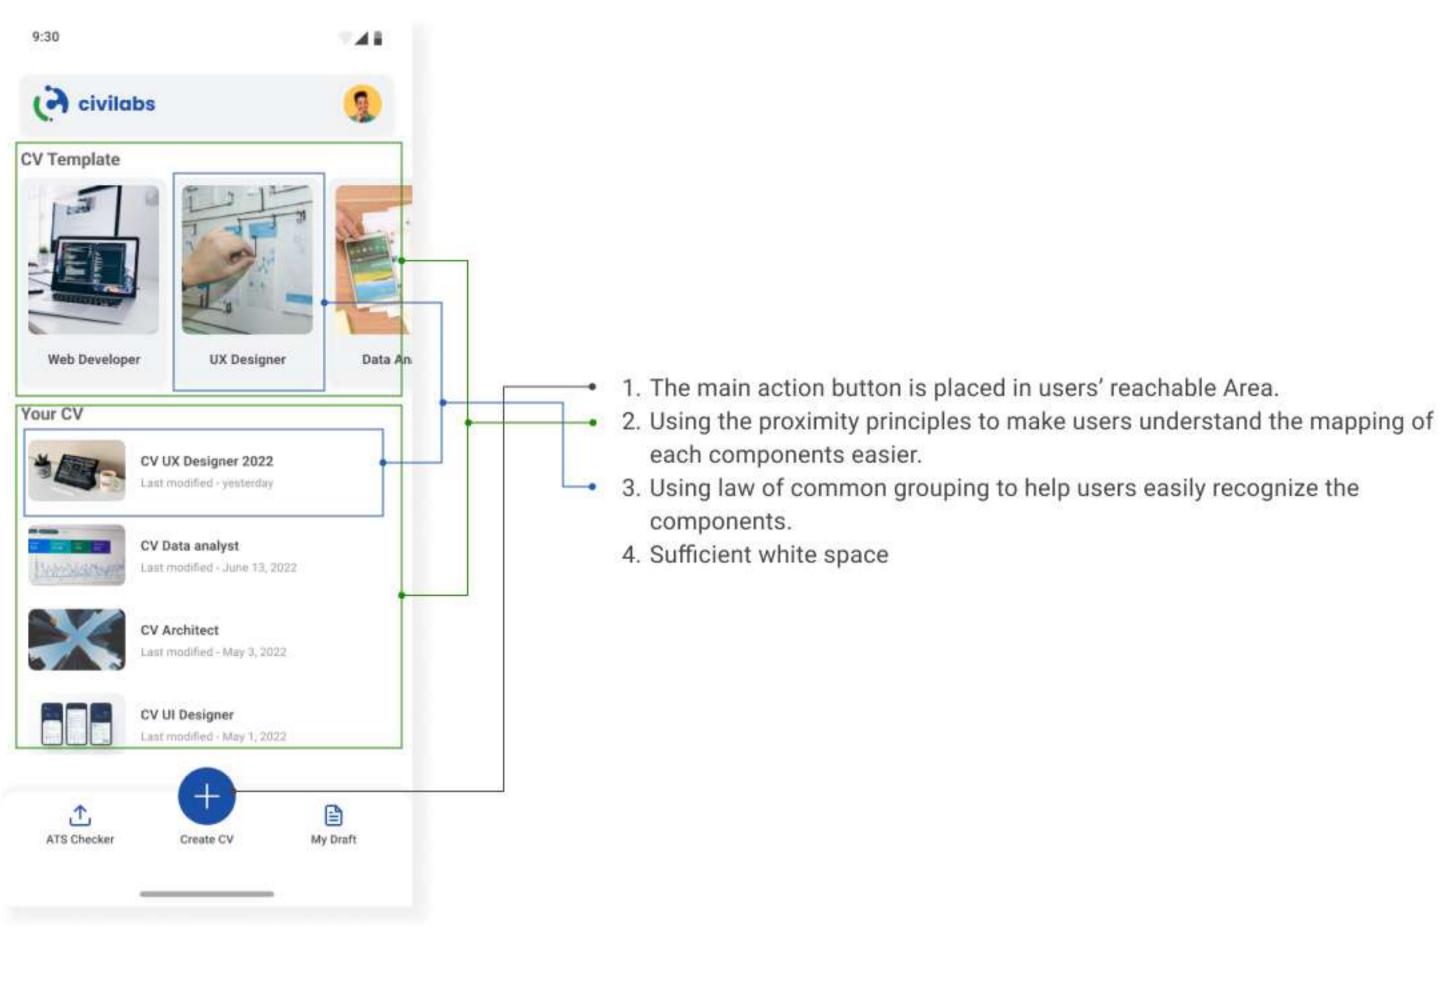

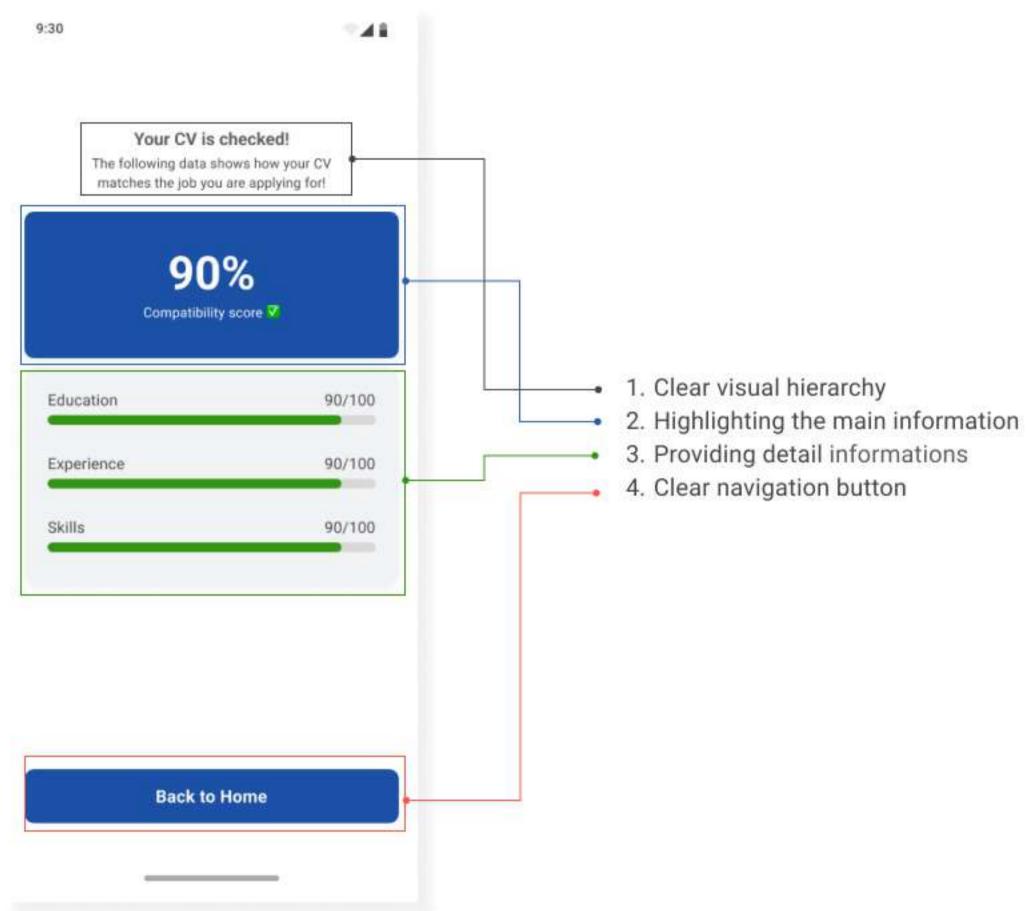

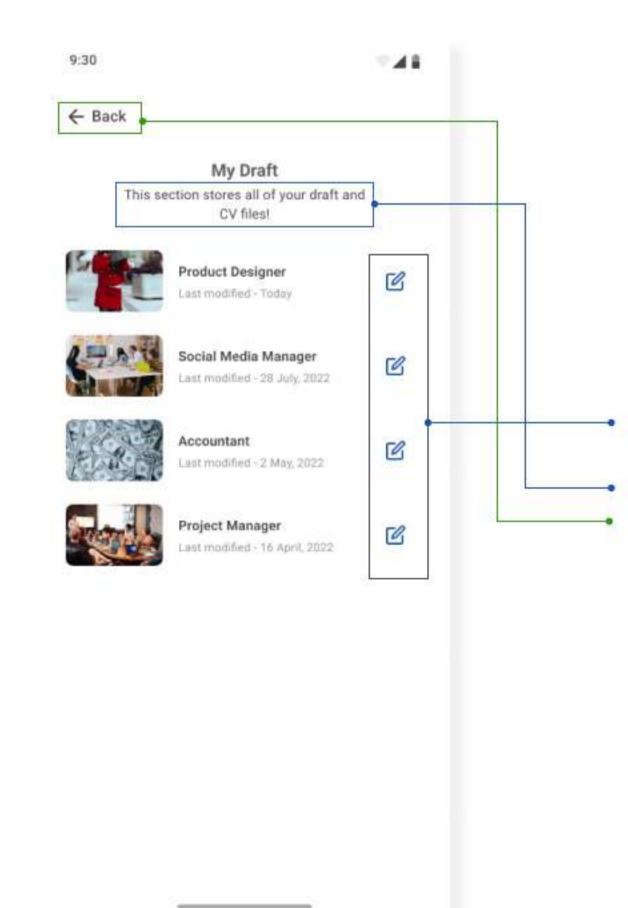

Hi-Fi Design

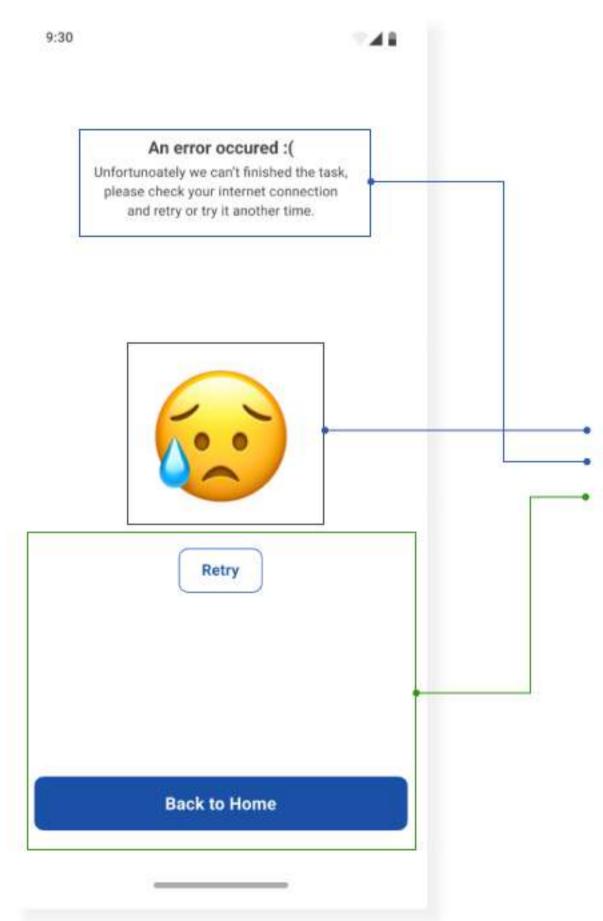

Design Narration

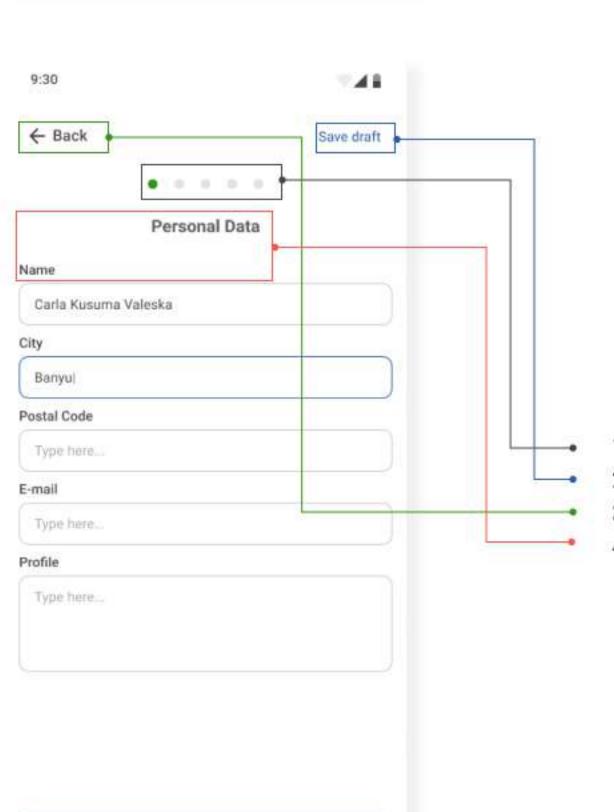

- Similarity principles, using the same color for a clickable button and link as in the other pages
- Inform users the description about the features
 the location of the navigation button is in line with the mental model of the user.

- Provide illustration to make users immediately realize what is happening
 Inform users what is possibly happened and what action to do
- 3. Provide the users buttons to take action

Save & Continue

- 1. Inform the users how many steps left to finish the task
- Provides users an option to continuing the task later
 Provides users an option to navigate to previous page
- 4. Clear section & input field title
